Likeli	Unlikely (1)	Low (1)	Low (2)	Medium (3)				
		Negligible (1)	Moderate (2)	Severe (3)				
		Impact						

Key Aspects of Risk Assessments:

Likelihood

The probability that an unfavourable event would occur if there were no or limited internal controls

• Significance or Impact

A measure of the effect on the council if the unfavourable event were to occur.

• Cause

The reason why an unfavourable event may occur

• Mitigation

How the council mitigates the risk and manages the residual risk

Risk Evaluation

• Low Risk - losses will be relatively small, negligible effect on service provision. However, without action then such risks may have more significant cumulative effect (ie incidental errors, absence, missed project deadlines)

- Medium Risk have noticeable effect on service provided. Event will cause a degree of disruption to service provision and have budgetary implications. Likely to happen infrequently and generally difficult to predict. More than one medium loss per year could have substantial impact or severity on service provision. ie fire, large theft, major systems failure, incidents of pollution on land)
- High Risks have catastrophic effect on the operation of the Council or its services. Event resulting in significant financial losses, major service disruption or significant impact to the public. Usually occur very infrequently and can be extremely difficult to predict. (ie total system failure, major accident/emergency ie storm damage to woodland, significant flood damage to land)

"After identifying and evaluating risks, councils need to decide upon appropriate measures to take to avoid, reduce or control the risks or their consequences." (OVW, 2019)

Managing Risk

Internal controls and mitigation measures to include:

- An up to date register of assets
- Regular monitoring/maintenance of key assets, ie fraud, land management, health and safety, data security
- Annual review of risk, control measures and the adequacy of insurance cover
- Ensure the robustness of insurance providers
- Resilient systems
- Contingency planning
